SHIS paper is now issued every day.

The subscription is fixed at Pive Dollars per annum delivered in Hongkong, or Eleven Dollars Forty Cents including postage to Cuast ports. It is the first Chinese Newspaper ever issued under purely native direction. The chief support of the paper is of course. derived from the native community, amongst whom also are to be found the guarantors and securities necessary

place it on a business and legal footing. The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,from Australia, California, Singapore, Ponang, Saigon, and other places trequented be the Chinese, -consider themselves justified in guaranteeing a large and ever-increasing circulation. The advantages offered to advertisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of

The field open to a paper of this description-conducted by native efforts, but progressive and anti-obstructive in toneis almost limitless. It on the one hand commands Chinese belief and interest. while on the other it deserves every aid that can be given to it by foreigners, Like English journals it contains Editorials, with Local, Shipping, and Commercial News and Advertisements.

A SCOTCH ENGINEER'S ADDRESS

TO SPAIN. It is stated that the real reason of the inactivity of the Spanish fleet at Cadiz was the difficulty of replacing the Scotch engineurs, who resigned their posts, refusing to

fight against the Americans. Oh, aye, I gar my engines shine, An' industry wi' brains combine. My wages-aye, they suit me fine-The job's a richt;

But, Maister Spain, I draw the line At wham I feeht !

Hongkong Tides.

The Tide Table given below has been compiled by the Nautical Almanac Office in London from the result of the analysis of observations taken by means of an au-tomatic tide recording machine in the Water Police Basin at Term Sha Tsui during the years 1887-8-9.

The zero of the table is Low Water Ordinary Spring Tides, which has been found to be 2 feet below mean sea level. To obtain the depth of water on the tide gauge at the Victoria Naval Yard add 5 ft. 7 in., and on the gauge at Lamont Dock, Aberdeen, add 18 it. 9 in. the height given in the table.

THE CURRENCY COMMITTEE. Allahabad, Aug. 26 .- A Proneer Special London telegram states that a Blue Book containing the evidence given before the Currency Committee, to the date of adjournment, is issued to-night (Thursday). Twenty-four witnesses were examined, including Mr Forbes, Mr Stephen Ralli, Mr Robert Steel, and Mr Christie (of Ceylon), besides other advocates of the re-

opening of the mints. Among the proposals for meeting the resultant deficioncy were the raising of the Custom Duties to 10 per cent; doubling. the Salt Tax; recreasing the Railway Rates; a new Export Duty on Jute; with an excee duty on Manufactured Articles; and doubling the Income Tax. But each of these expedients admittedly will yield only a fraction of the amount required. The Committee are decidedly unfavour-

ably impressed, judging from the Blue Book, by the evidence and suggestions of the above witnesses. Lord Rothschild, Sir Samuel Montagu, and Mr Raphael all stated that the gradual accumulation of a gold reserve would be necessary for a Gold Standard; but agreed that this could be done without disturbing

the Money Market.

Mr Lindsay, of the Bengal Bank, and Mr Leshe Probyn expounded their respective plans. The former's plan was admitted to be ingenious; but the adoption of an artificial system was considered unlikely. Sir Antony Macdonnell gave important evidence concerning the incidence of land assessment, internal trade, and taxation. He and other official witnesses effectively disproved the statement persistently made in London that the reduction in the value of silver ornaments following on the closing of the Mints caused discontent in India. Sir Antony affirmed that there are ten ornament-buyers to one seller. These witnesses also showed that the predictions regarding serious illicit coinage are.

groundless. Further evidence will be taken in Octo-

The present tendency of the opinion of the Currency Committee is confidently stated to be as follows :-The question of the re-opening of the Mints is absolutely extinct. The Government must proceed to the effective establishment of a Gold Standard, with a rate of sixteen-pence, accumulating a gold reserve, and ensuring its convertibility immediately

success is assured. Meanwhile temporary measures should be adopted during the transition period to meet the present prolonged mouetary stringency. Close attention should be given to the maintenance of a strong financial position. It is thought the Committee will recommend a plan which, while not identical

with any yet suggested, will aim at combining the best elements of each, London, August 26. - The evidence given port and export trade of India and Coylon. COUNCIL. At yesterday's meeting of the Legislative Council, a Bill to amend the Birth and Deaths Registration Ordinance, and a Bill authorising the imposition of fees for naturalisation, were passed into law.

BIRTHS AND DEATHS RECISTRATION (AMENDMENT) OUDINANCE.

The Attorney General said—I have the honour to propose the first reading of a Bil outitled an Ordinance to amend the Births and Deaths Registration Ordinance, 1896 Section 10 of Ordinance No. 16 of 1896 deals with the subject matter of where a child having been registered it is desired to alter the name. In some cases when the child has been registered shortly after birth its name has not been fixed upon at the time. A name has been given to the child on registration, and it has always been competent for the parent or person giving the name to make a declaration in writing before the Registrar General; but in a recent case a lady had left Hougkong and she cannot make that declaration. She could make a declaration before a notary in Germany but the Secretary of State has suggested that the section should be amended. It is therefore proposed to amond the section by adding at the end the following-words :-Provided that whenever it is shown to the satisfaction of the Registrar General that owing to absence from the colony or other reasonable cause, the parent, guarlian, or other person procuring name to be altered or given, is unable to attend personally before Registrar General to make declaration in writing in accordance with section, the Registrar General may, in his discretion, accept in lieu thereof a declaration in writing made before any person competent to take statutory declarations or may accept such other evidence as he may n the circumstances doom sufficient, and may, thereupon, act in all respects as if a leclaration in writing had been made before him personally.' Three gentlemen were found to youch as to his character, and I should think they will be heartily ashamed of themselves by now. The new Ordinance says that the three persons called by the applicant must be persons in no way directly or indirectly connected with the sale of liquor to the applicant. There is also an amendment suggested by the police as regards illicit dis tilleries. Under the old law when the police discovered an illicit distillery they could only seize the pans. They might find a lot of vats of liquor but they could not touch them: This has been amended, and the police will be able to seize the whole paraphernalia. Then the wording of the interpretation of terms at the beginning is entered. It is made more logical. builds a house on a qualarial site. An excellent account is given of the history and distribution of plague, summarizing the experience of observers in India and the Far East. Quarantine unless combined with the speedy discovery, and isolation of the infected, cleansing or even abandoning houses does not find much favour with the author. Although quarantine may keep out a portion of the infected the rat remains a powerful factor to be reckoned with in the dissemination of the disease, and more attention might be given to the destruction of these vermin. Serum therapy has so far proved disappointing. The results we were led to expect from Yersin's scrum after the accounts of its success in China have by no means been fulfilled in India. Haffkine's serum has

given more promising results. Under beri-beri, the author dissents from the view that the pathogenic organism is directly introduced with the food, and inclines to the view that the germ resides in the soil or surroundings and there elaborates a toxin which when inhaled or swallowed by the individual produces the neuritis, &c., so typical of the disease, just as ntemperate. The author regards berieri, therefore, as a place diseaso probably not communicable from man to man. Doubtless certain physiological characteristics favour the running of the disease in families, but proof is lacking to show, and it is difficult to conceive the direct transmission of the bacillus in the ovum. Naturally members of a family living closely together and under the same conditions of food and hygiene are the most likely to contract the disease by contagion, but at the same time it must be admitted i that it is not markedly contagious, and we | European troops in the garrison. Goods per Cathay undelivered after this

THE news of the foul murder of the Empress Elizabeth, of Austro-Hungary, at Geneva, by an Italian fanatic of the anarchist breed, was received in Hengkong with abhorrence of the deed, and of sympathy with the old Emperor, Francis Joseph. We have given elsewhere some facts concerning the worthy lady who has been so cruelly done to death, and may here say a word or two touching the results of such displays of cowardly fanaticism. There may be some grounds for believing that good principles underlie the creed Goods per Monmouthshire undelivered of many a Socialist, or even an Anarchist, or a Nihilist. The aspirations of the Socialist may be of the purest, if they are of the most impracticable, nature. Chamber of Commerce Room, City The wrongs of many an Anarchist or a Nihilist may be sufficient to lead him to change the form of government; and, as the great Gladatone admitted or rather asserted, Socialism may (or must) be the dominating factor of the next century. Goods per Witte herg undelivered after There may indeed exist griovances which can never be thoroughly redressed on the Continent until a great change of government is made. With those admissions, the use of every proper and humane means of bringing about reform and the redressof grievances, may also be conceded. But when the advocates of new conditions seek to gain their ends by means which are at once condemned by every right-thinking citizen, the whole scheme of reform pro-3 p.m. - Auction of Lesschold Property, posed is at once discredited and brought into disrepute. When the mild Czar Alexander was done to death by a bomb, his death was lamented by the civilised world, because, although the Czar of all the Russias, he had done-more for the Russian people than any other of their rulers; and because his death was nothing less than a murder. When President Carnot what assassinated, the death of that peaceful and peace-loving French gentleman merely moved all good-hearted The O. & O. Co.'s s. s. Belgic, with mails men with disgust when contemplating the horrid methods of this new order of things. But of all horrors, the mere mention of the cold-blooded murder of one of the greatest peace-making ladies of Europe-merely because she was the consort of an Emperor-turns every heart that beats in unison with the eternal fitness of things into stone against the fiendish coward who 1½% pm. has so taken the life of a lady, a woman, who, whenever she spoke on or acted in political things spoke and acted on behalf of peace. But this horrible act does more than this. It shows he the 51% pm. cruel means thus adopted, what may think of the spirit under which the so-called glorious era of Socialism, Anarchy, etc., is likely to exist. In plain language, assassination under any circumstances is not only a orime but a political blunder. An ordinary assassination-say of an Emperor or a President-sets back the triumph of even-imagined reforms by many years The cruel and utterly cowardly murder of the Empress of Austria will retard the progress of every such reform for, say, a quarter of a century.
